Wide range of applications

Parties & business events

Weddings & wedding ceremonies

Shows & concerts

Workshops & presentations

Sustainability

As a shipping company on one of the most beautiful rivers in Europe, sustainability is very important to us.

That is why we embarked on a journey towards greater sustainability in passenger shipping some time ago.

[Our sustainability concept](#)

Our fields of action in the area of sustainability

We are guided by the United Nations' 17 Sustainable Development Goals and are implementing specific measures in these five fields of action:

1. **reducing emissions**, e.g. switching to gas to liquids as fuel, installing more fuel-efficient engines, throttling drives, extending the timetable
2. **water protection**, e.g. use of high-quality paints with a long shelf life, state-of-the-art waste water tanks, dry urinals in the toilets
3. **sustainable catering offer**, e.g. ingredients from local producers, drinks from local producers, serving portions according to demand, to avoid food waste

4. **sustainability in the office and administration**, e.g. fair wages and salaries well above the minimum wage, open-mindedness, promotion of working from home and further training, digitalisation of ticket sales
5. **climate-neutral transport**, true to the motto "avoid, reduce, compensate"

We have issued a declaration on the German Sustainability Code and report in it on the basis of the 20 criteria of the DNK our sustainability efforts.
